

# MIGHTY SWAT BY WAGNER

Gave Game to Pittsburg Yesterday, 5 to 3

## IT WENT TEN INNINGS

Lindaman and Leever Were About Evenly Divided in Box Honors, Although Pirates' Raps Were Longer Than Boston.

Boston, June 16.—Honus Wagner's home run drive over the left field fence, sending in Leach ahead of him, won yesterday's game for Pittsburg in the tenth inning yesterday, the score being 5 to 3. Wagner was quite a factor in the game as usual, getting three hits out of four times up and making some pretty plays in the field.

The pitching honors were about even between Leever and Lindaman, each allowing ten hits, but the Pirates' raps were longer than Boston.

Boston tallied in the first inning on McGinn's home run drive over the left field fence, but Pittsburg evened up in the second inning on a pass to Wagner, a sacrifice by Batty, an out and a slow hit by Wilson; and went ahead in the third on Leach's fielder's choice and Clark's double. Wagner's double, a passed ball and Batty's double gave the Pirates another in the sixth, but they lost the services of Batty, who kicked so hard at being called out at the plate that he was put out of the game. Starr replaced him, and his misplays came near losing the game for Pittsburg.

In the seventh after Lindaman had tied up, Beaumont got to third on Starr's wild throw. Brownie singled and Beaumont scored. McGinn singled and Leach scored. In the eighth, McGinn struck out, but Lindaman 2 by Leever; base on balls, by Lindaman; by Leever 2; passed ball, Graham; double play, Starr to Kane.

WEIGHS 320, FELL.  
Indiana Woman Smashes Telephone Pole as She Drops.

Evansville, Ind., June 16.—Mrs. Abraham Israel, who weighs 320 pounds, broke down a second-story balustrade Sunday night and fell to the ground. In her fall she struck a telephone wire, which sagged under her weight, and she was recoiled against a cistern, breaking three ribs. Her fall cracked the crossarm of the telephone pole and put the line out of business.

SILENT GUN FEARFUL WEAPON OF WAR.

Maxim's Invention Likely to Necessitate a Revision of Military Tactics.

Washington, June 16.—It is expected here that a government test of Maxim's invention of a noiseless gun will be made soon.

"Adoption of a noiseless gun" said one of the experts of the ordnance bureau, "would necessitate the solution of a number of entirely new military problems. It would add tremendously to the horrors of war."

"Any one must be able to realize that a noiseless weapon will add an element of terror impossible to describe adequately. Smokeless powder robbed the soldier of the sense of sight in connection with the discharge of firearms. Now it is proposed to rob him of the sense of hearing. With two senses rendered useless it is easy to see that his mental attitude will be one of greater helplessness."

"Assuming both armies in a given conflict were armed with noiseless guns, I would say the advantage would be with the attack. Were only one side armed with the weapon, the advantage would rest with the side so equipped."

"In case of a night attack it might be that the introduction of the new weapon would necessitate an absolute new plan of defense. Under cover of darkness outposts could be shot down from a distance without raising an alarm, and it would be easy to surprise the camp."

"Sharpshooters would be placed at a greatly increased advantage were the noiseless gun used. Always a grave danger, they would become a positive peril. They would shoot men down with slight chance of their location being noted, and the sense of terror this would inspire in the enemy would be hard to have a demoralizing effect."

"If the test made was successful as has been declared, Mr. Maxim has made a discovery which will necessitate much study on the part of military experts."

## KEEPER MISSING, ASSISTANT KILLED.

Mutilated Body of Latter Found in a Boat—Double Murder. Feared.

Munising, Mich., June 16.—George Genery, keeper of the North light on Grand Island, is missing, and his assistant, whose name cannot be learned, is dead, his head beaten to a pulp. Officers have gone from Munising to search for Genery.

The patrol of Anasible life saving crew between Munising and Grand Island discovered a boat adrift. Investigation proved it to be from the North light of Grand Island, and it contained the body of a man whose head was disfigured beyond all recognition, later identified as that of the new assistant who had been on duty at that light house only a short time.

Genery was in Munising on June 9 for provisions and started back for the light, intending to return June 13 to move his family there. The provisions were found in the boat house near the light but both boats are missing and nothing more can be learned.

The lighthouse is on the extreme north point of Grand Island, seven miles from the house of the same name of the Cleveland Cliff game preserve and 10 miles from Munising. It is an isolated spot upon a rocky coast. It is said that the light was not seen on Thursday night, but this report cannot be verified.

A double murder is feared, as both men said to have received their pay the day Genery was here.

# GO OVER TO MULAI HAFID

4000 Moorish Troops Desert Abdul Aziz

## OFFICERS MADE PRISONERS

Venezuela Seizes Two Dutch Vessels—They Are Stopped and Search Is Made on the High Seas.

Tangier, June 16.—Details of the revolt of 4,000 of the troops of Sultan Abdul Aziz's army at Kas-el-Kebir, 58 miles south of Tangier, have been received here. They say that the sultan's troops were going from Tangier to Rabat, and that upon the arrival of one hundred of Mulai Hafid's horsemen with letters ordering the army to Fez to join Mulai Hafid, the uprising sultan, having killed the protests of their officers, who were made prisoners, multiplied and proclaimed Mulai Hafid as sultan.

Washington, June 16.—The American minister at Tangier has reported to the state department that the garrison at Alcazar, fifty miles from Tangier, after having killed the commander, have declared for Mulai Hafid. The minister states that the governor is said to have been sent to Fez as a prisoner.

## VENEZUELA HOLDS VESSELS.

Two Dutch Sloops Seize, and Their Correspondence Retained.  
Willemstad, Island of Curacao, June 16.—Two Dutch sloops, the Marion and the Carmita, plying between Aruba, a Dutch island near the coast of Venezuela, and Curacao, have been detained by a Venezuelan coast guard vessel on the high seas off La Vela de Coro, a seaport of Venezuela on the Gulf of Coro. The sloops were stopped by shots from the Venezuelan vessel, and obliged to proceed to Coro, where they were detained for two days. All letters outside of mail bags on board the Dutch sloops were retained by the Venezuelan authorities.

It is rumored that the Venezuelan consul here has received orders from his government to close the consulate in case of trouble with the Dutch authorities or the people, and that his action in denouncing this government as being hostile to Venezuela has been approved by President Castro.

ARREST DANGER IN CREDIT BETTING.  
If New York Bookmakers Make Payment of Wagers They Break the Law.

New York, June 16.—It is possible that the English system of credit betting may solve the problem which confronted the bookmakers following the passage of the anti-race track gambling laws by the legislature last week. This cannot be done without risk of arrest, but it will be only in the payment of wagers that any danger will be encountered.

Asst. Dist. Atty. Elder of Kings county said yesterday that while he is as determined as ever to stamp out gambling at the race tracks, still there are some points which cannot be ignored. He said that to get a clear case against a bettor or a bookmaker there must be a posting of odds, the passing of money, or the consummation of some sort of a contract.

Asked if this would not permit credit betting at the tracks, Mr. Elder said it probably would, but would not permit the payment of wagers anywhere else at any later time and that if such payments were made, they very likely would be taken cognizance of by the grand jury and prosecuted.

Mr. Elder was in conference with Deputy Police Commissioner Baker yesterday. He denied that there had been any trouble between himself and the police department.

## KAISER PREVENTED SERIOUS ACCIDENT.

Skiff Rowed by Girls Was in Yacht's Path and He Acted Quickly.

London, June 16.—According to Berlin dispatches, the Kaiser's presence at a minor accident while the imperial yacht Alexandria was carrying him to Berlin from the annual regatta at Grunau. The yacht was threatening its way through the crowded boats, when a skiff rowed by girls and steered by a man attempted to cross its bows.

The emperor was the first aboard the yacht to notice the danger and promptly signalled: "Stop; revert engines." At the same time, by the Kaiser's orders, a sailor lowered himself overboard and snatched off the boat with his foot, to the great relief of the occupants, who seemed paralyzed with fright.

The Alexandria proceeded among the uproarious cheers of the crowds on the river bank who had noticed the incident.

## TEMPERANCE FOLK MARK BIRTHDAY.

100th Anniversary of First Society Is Observed at Saratoga, N. Y.

Saratoga, N. Y., June 16.—The World's Temperance Congress assembled here yesterday to commemorate the 100th anniversary of the organization of the first temperance society. Yesterday's sessions were devoted principally to welcoming the delegates.

At the morning session papers by the Revs. George H. Vibbert, D. D., of Springfield, Mass., and Dr. Charles Ingraham, of Cambridge, N. Y., were read, after which the Christian Civic League of Male took charge of the exercises.

## WAS HIDING IN MOUNTAIN.

Man Accused of Killing His Wife Is Captured.

Danbury, Ct., June 16.—Edward W. Schinaz, of Middletown, N. Y., who is alleged to have shot and killed his wife, Ida, here, was captured on Shenandoah mountain, near Pongkeepsie, N. Y., yesterday, by Police Capt. Bradley.

# BONAPARTE WILL STAY

He Does Not Intend to Quit The Cabinet

## THE REPORT DENIED

At the White House—Valuable Coal Deposits in Alaska Reported—Russell Tells of Work Against Southern Peonage.

Washington, June 16.—The president and Attorney General Bonaparte intended to go out of office on the 15th of March, and Mr. Bonaparte has just as little idea as the president of going out sooner.

This statement was made at the White House in reply to rumors that there existed a serious difference between the president and attorney general that would probably lead to Mr. Bonaparte's leaving the cabinet very soon after the presidential election.

The special difference cited in this connection related to the removal of District Attorney Rulick and United States Marshal Rounds of Idaho, which, it was declared, was opposed by Mr. Bonaparte and insisted upon by the president, and in relation to alleged differences over bringing a suit against the New York, New Haven and Hartford railroad company.

At the White House it is declared that the removal of Rulick and Rounds was determined on six months ago, but it was deemed best to wait until certain suits on which they were engaged were concluded.

## MRS. ROOSEVELT AT HOME ON A HORSE.

President's Wife Takes Almost Daily Rides in Suburbs of the Capital.

Washington, June 16.—Mrs. Roosevelt is enjoying almost daily horseback rides through Rock Creek park and the suburbs of Washington, but soon she will send all the White House horses to Oyster Bay for the summer.

Mrs. Roosevelt is an experienced and enthusiastic horsewoman, but is frequently compelled to mount in her own way. She never rides away from the White House on horseback, driving usually to Sixteenth street and Columbia road, where the horses for the party are waiting. It is only when the president goes along that an orderly accompanies the party, and usually the little group includes Miss Ethel Roosevelt and some of her friends. Mrs. Roosevelt, instead of depending upon an attendant, uses a convenient water plug as the means of reaching her saddle.

## RICH COAL FIELD ON BEHRING RIVER.

Alaska Beds Range in Thickness From Twenty Inches to Thirty Feet.

Washington, June 16.—That the development of the Behring river coal field is destined to be of far-reaching importance in the future coal operations on the Pacific is contained in a bulletin issued by the Geological Survey giving the results of the first detailed survey made of any Alaskan coal field. The bulletin was prepared by G. C. Martin, and deals with the geology and mineral resources of the Controley Bay region.

"Our warships are now dependent for first-class smokeless coal on shipments from Atlantic ports," the bulletin says. "When it shall be possible to obtain at Controley Bay a naval fuel as good as that now shipped from West Virginia, Maryland and Wales, the movements of our fleet on the Pacific will be much more easily accomplished than they are under present conditions."

The bulletin estimates that approximately forty-seven squares of the area shown on the maps are underlain with workable coal deposits, and that the measured sections given in his report show coal beds ranging in thickness from 20 inches to more than 30 feet. Field tests indicated that much if not all of the semi-bituminous coal will yield, by proper treatment a coke of good quality.

## FELL ONE HUNDRED FEET FROM MT. GREYLOCK.

Two Sons of Prof. Dale Have Narrow Escape from Death.

Pittsfield, Mass., June 16.—Falling off a four-hundred foot precipice on Greylock mountain Saturday afternoon, Nelson Dale, an instructor in the public schools of Providence, R. I., and his brother, Arthur Dale of this city, sons of Professor Nelson Dale of the United States Geological Survey, just escaped with their lives. Their horses fell to the bottom of the chasm and was instantly killed. The Dale boys jumped simultaneously and both landed on the branches of a pine tree one hundred feet down. They were unhurt. George Persip, the driver, rolled down the mountain side and escaped with only a broken ankle. The Dale had a heavy load and had reached Card's bridge over the chasm about two-thirds up the mountain, when the horse balked and backed over the loose board railing into the ravine.

## SAID SHE'D DIE, BUT SHE DIDN'T; FEELS BETTER NOW.

Mrs. Kiselcia Consents to Eat and Surgeons Think She'll Soon Be Well.

Passaic, N. J., June 16.—Mrs. Anna Kiselcia, who forecast that she was to die Sunday morning, and who was greatly disturbed because her prediction was not fulfilled, seemed to be in a rather better frame of mind yesterday, and the physicians at the General hospital hope for her recovery.

Except for the delusion that an angel warned her that her death was to occur Sunday, the woman seems to be normal and she talks sensibly on all topics other than her predicted death. When the hour for her prophesied death passed, the woman became sulky, but Sunday night her mood changed and she ate a hearty meal.

# SOMETHING NEW

Sunday, June 21

A delightful Sunday Outing. Five hours sail through the Southern Bays of Lake Champlain from Williamstown, Barre, Montpelier, Middlesex, Waterbury, Richmond, Williston, Essex Junction, Winooki, and all immediate stations.

Central Vt. Ry., Burlington and new steamer "TICONDEROGA."

This outing has been arranged in order to accommodate a large number of people who are unable on week days to enjoy a trip of this kind.

Fare for the round trip which includes the rail ride to Burlington and 5 hours boat ride on Lake Champlain.

Williamsstown.....\$1.25  
South Barre.....1.25  
Montpelier.....1.25

Arrive Burlington (Steamer).....10:15

For five hours sail through the Southern Bays of Lake Champlain. On the return trip the steamer will arrive at Burlington about 4.30 p. m., giving about two hours at Burlington to see the attractions of that city before returning. Train will leave Burlington at 6:30 p. m. for Williamsstown and intermediate stations. Tickets good only for continuous passage and will be good only on train made above June 21. You cannot afford to miss this delightful day's outing at the price of a ticket.

G. C. Jones, G. M. J. W. Hanley, G. L. Pass. Agt.

## 100,000 PESOS TO ENTERTAIN FLEET.

Government at Manila Appropriates That Sum For Blowout.

Manila, June 16.—The government has appropriated 100,000 pesos for the entertainment of the Atlantic fleet during its visit here. Some opposition is anticipated in the assembly, but it has not developed yet.

The assembly has unanimously passed a compromise appropriation bill. The only assemblyman which has been reduced from 80 to 29 pesos.

## ICEBERGS AND FOG.

Big Liner Lost in Iceberg Fog For 40 Hours.

New York, June 16.—The first real encounter a ship has had this season with the combined terrors of iceberg and fog was reported yesterday by the incoming steamship California, of the Anchor Line. For forty consecutive hours Captain James Blaikie stood on the bridge after two huge bergs had been passed and fog had settled over the vessel.

All the while the thermometer was watched with ceaseless vigil for the telltale drop in the temperature that would indicate that mountains of ice were in the vicinity.

Passengers saw a number of whales, three of which were passed near Fire Island. They were headed toward the shore, and at last, about 10 p. m., were swimming they may reach the beach at Babylon today.

## HIS HOUSE PORCHLESS.

Lamentable Architectural Defect in Taft Residence.

Cincinnati, O., June 16.—The report that Secretary Taft will conduct a front porch campaign in the event of his being nominated for president on the Republican ticket is discredited by the disclosure here of the fact that Mr. Taft's house has no front porch. Either the proposed front porch campaign will have to be abandoned or the Taft residence will have to be remodelled and equipped with an up-to-date front porch of proper strength and endurance.

## Rural Telephone Service.

Under a new plan for rural telephone service proposed by the Vermont Telephone and Telegraph company, owners of farms, country homes of city business people, clubs, camps, stores, etc., in places having a population of 20,000 or less, can have telephone connections with the general system of New England at very moderate cost. The principal features of this plan are the construction of local lines by subscribers themselves and connection with the nearest central office of the Vermont Telephone and Telegraph company, which makes a charge of 50 cents per month for residence and 75 cents per month for place of business, to cover the cost of operating. The subscribers get unlimited communications with all the subscribers of the exchange with which they are connected, and access to the toll lines covering all New England and the eastern part of the United States. This arrangement is of peculiar advantage to subscribers for this class of service. Half a dozen or more neighbors may club together, set their own poles, do their own work of construction, buying only wire, glass insulators and brackets, purchase their instruments outright or lease them from the company if preferred. This plan enables residents of localities too remote for remunerative development by the Vermont Telephone and Telegraph company to obtain telephone service, and as that of nearby towns and cities, and at moderate cost.

## Five Minutes

saved at meal time may mean a bad case of indigestion before bed time. Cure it quickly with a dose or two of

Beecham's Pills

Sold Everywhere. In boxes 10c and 25c.
